

## CONSTRUCTION UPDATE: MARCH 2, 2006

### *O Street Closing*

O Street from 44th to 52nd will be closed on Monday, March 6, 2006, at 8:30 a.m. for the construction of the 48th & O Street widening project. Detoured traffic going east-bound will be directed to R Street at 44th Street, and then return to O Street at 52nd Street and vice versa for west-bound traffic. This closure will be in effect until approximately August 31, 2006.

Traffic on O Street between 32nd and 44th Street will be shifted to the north side of the existing roadway in conjunction with the roadway closure to facilitate construction of a new water main. One lane of traffic will be maintained along O Street in each direction between 32nd and 44th Streets with a center turn lane provided at various locations to allow left turns at adjacent side roads and businesses. The water main work will also require short term closures on 33rd Street and on 40th Street to complete portions of this work. The water main is anticipated to be complete by June 30, 2006.

Following the closure on O Street, the outside southbound lane on 48th Street from O to R Streets will be closed for approximately three to four weeks in order to build a temporary traffic lane to accommodate the upcoming reconstruction work on 48th Street. The remainder of 48th Street will be open to traffic during construction of the temporary lane.

While the changes will start at 8:30 a.m. on Monday, the changeover in traffic will take most of the morning. Drivers need to remain patient and stay alert when traversing the area.
